

House Price Index

- April 2009

9 June 2009

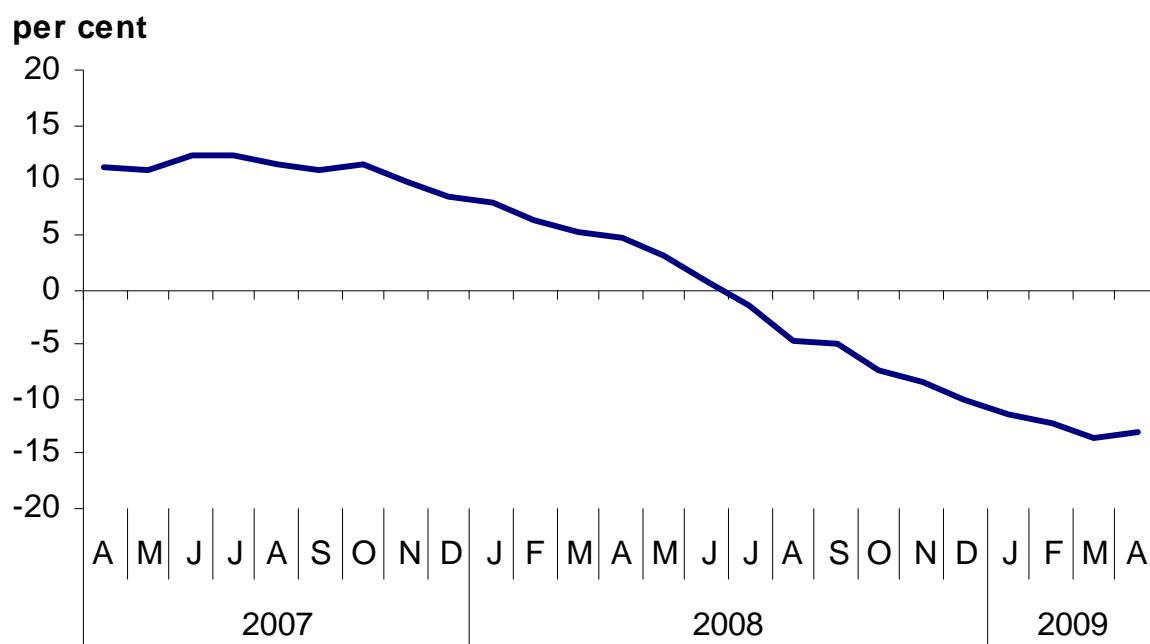

- UK house prices were 13.0 per cent lower than in April 2008.
- The mix-adjusted average house price in the UK stood at £189,215 in April 2009 (not seasonally adjusted).
- UK house prices fell by 3.0 per cent in the quarter ending April 2009. This compares with a fall of 3.9 per cent for the quarter ending January 2009.
- Annual average house prices fell in England (-13.2 per cent), Wales (-10.3 per cent), Scotland (-8.6 per cent) and Northern Ireland (-22.8 per cent).
- Annual average house prices paid by first time buyers in April 2009 were 16.0 per cent lower than a year ago. By comparison average house prices paid by former owner occupiers were 11.9 per cent lower.

House Price Index: UK

Figure 1: UK annual house price rates of change (all dwellings)

		UK		UK	
		All dwellings		All dwellings	
		Index Feb 02 = 100	% change over 12 months	£	
		Not seasonally adjusted			
2008	Nov	167.7	-8.5	199,933	
	Dec	163.8	-10.2	195,317	
2009	Jan	164.2	-11.5	195,114	
	Feb	159.7	-12.3	189,747	
	Mar	157.5	-13.6	187,193	
	Apr	159.2	-13.0	189,215	

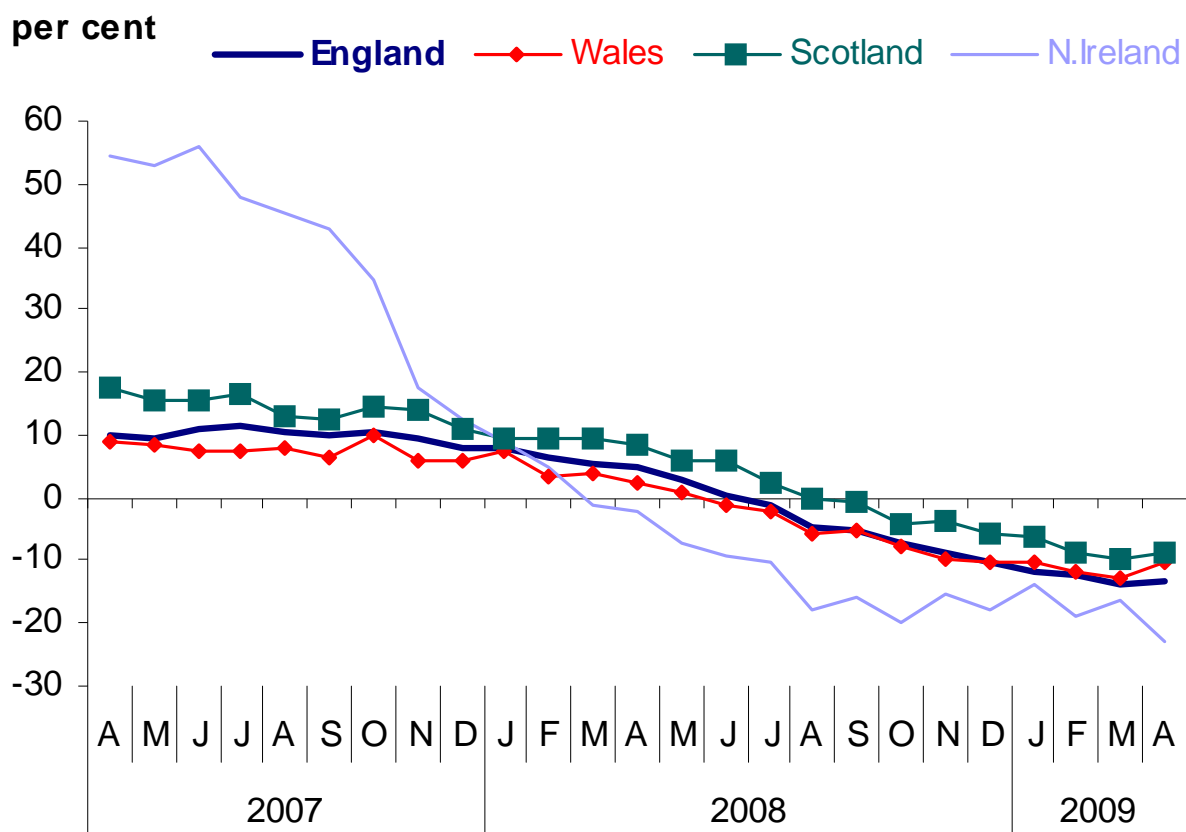

The UK average house price fell by 13.0 per cent in the year to April 2009, compared with a fall of 13.6 per cent in the year to March. Between March and April there was a rise of 1.1 per cent in the prices index of properties bought compared with a smaller rise of 0.4 per cent over the same period last year, resulting in an increase in the annual rate.

The rise in UK prices between March and April 2009 can be attributed to an increase in average prices for terraced houses (2.0 per cent), semi-detached houses (1.0 per cent), flats (0.9 per cent) and detached houses (0.7 per cent). The rise is partly offset by a fall in the average price of bungalows (0.7 per cent).

House Price Index: Country

Annual house prices fell in all UK countries in the year to April 2009. Annual house price growth was -13.2 per cent in England, was -10.3 per cent in Wales, was -8.6 per cent in Scotland and was -22.8 per cent in Northern Ireland in April.

12-month percentage change

House Price Index: Region

Average house prices rose in six of the English regions during April and fell in the other three.

The annual house price growth ranged from -10.1 per cent in the West Midlands to -15.0 in London. The annual growth rates in the other regions were -10.4 per cent in Yorkshire and the Humber, -10.7 per cent in the North West, -12.5 per cent in the East Midlands, -13.0 per cent in the North East, -13.3 per cent in the South West, -13.8 per cent in the South East and -14.8 per cent in the East.

12-month percentage change for the latest month

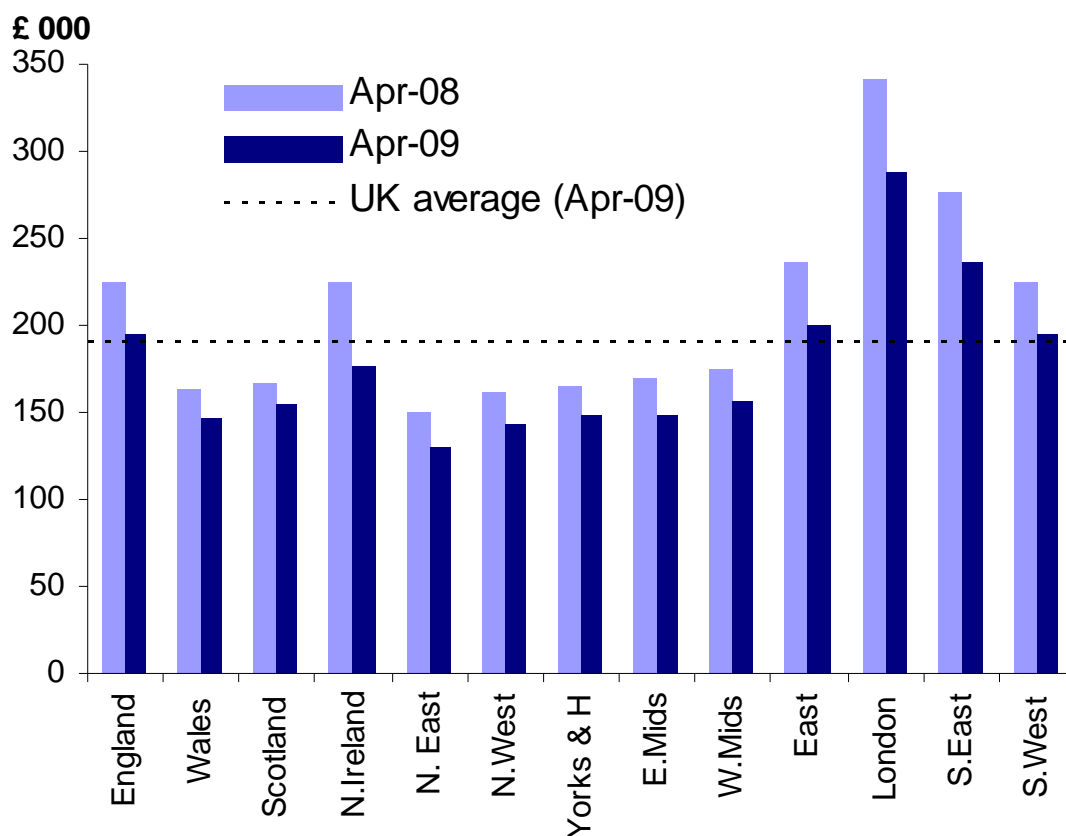

House Prices: Countries and Regions

Mix-adjusted average house prices in April 2009 were £194,554 in England, £147,204 in Wales, £154,387 in Scotland and £176,838 in Northern Ireland.

The English region with the highest average house price in April remains London at £288,507. The lowest average price was in the North East at £129,776.

Of the English regions, only the East, London, South East and the South West had average prices above the UK average.

House Price Index: Type of Buyer

The UK annual growth in house prices for first time buyers rose from an average -16.7 per cent in March to -16.0 per cent in April. There was an increase of 1.4 per cent between March and April in the price of properties bought by first time buyers compared with rise of 0.5 per cent last year resulting in an increase in the annual rate.

The annual house price growth rate for former owner occupiers was -11.9 per cent in April, up from -12.4 per cent in March. The prices index between March and April for properties bought by former owner occupiers rose by 1.0 per cent compared with a smaller rise of 0.4 per cent at the same time last year resulting in an increase in the annual rate.

The average price paid by first time buyers across the whole of the UK was £135,416 in April, while the average price paid by former owner occupiers was £222,344.

Additional tables and earlier data can be accessed in the 'Live tables' section (housing market and house prices) at:

<http://www.communities.gov.uk/housing/housingresearch/housingstatistics/housingstatisticsby/housingmarket/>

Background notes

1. The mix-adjusted house price series are produced by Communities and Local Government and are being published as official statistics. Development of the methodology underpinning the indices has been undertaken in conjunction with the Office for National Statistics. In light of the recent Statistics and Registration Service Act 2007 we will seek advice from the UK Statistics Authority, at the most appropriate time, to gain accreditation for the index as a 'National Statistic'.
2. Since April 2005 the new mix-adjusted house price index is based on an enlarged sample of completions data (about 50,000 per month during 2007) from about 60 mortgage lenders who supply data through the Regulated Mortgage Survey (RMS) of the Council of Mortgage Lenders (CML)/BankSearch. Prior to this date the index was based on the Survey of Mortgage Lenders (SML) (about 25,000 completions per month). The number of cases received will also be affected by the total number of mortgages that have been completed.
3. In January of each year the index weights are revised to reflect the pattern of property transactions during the previous 3 years. The mix-adjusted average prices for the rest of the year are then determined using these new weights. Consequently whilst house prices **within** the year are comparable - they are all based on the same weights - house prices **between** years cannot be compared because last year's weights and this year's weights are different. The index itself is constructed on a chain-linked basis, which enables year-on-year comparisons to be made. This means that the year-on-year change in the index for April, say, is effectively the change in the average price from April 2008 to December 2008 (using the weights for 2008) combined with the change in the average price from January 2009 to April 2009 using the weights for 2009. Therefore, the year-on-year change in the index is not the same as the year-on-year change in the mix-adjusted average price.
4. The Communities and Local Government index is currently showing a similar trend in annual house price rates to other indices available from commercial sources. Differences will be affected by differences in weighting. The Communities and Local Government index uses expenditure weights, whereas other indices use transaction weights. Consequently, the Communities and Local Government index is influenced by house price growth rates in the higher priced areas (which are currently in the South) where house prices - and therefore total expenditure on house buying - is highest. Similarly, regional rates of change in house prices determined by the Communities and Local Government are more influenced by the market for the higher priced properties (i.e. the demand for detached houses).
5. The Communities and Local Government house price index figures in this issue are based on completions during the month of April. Other recent indicators have been based on asking prices in April or based on mortgages approved during April. Therefore the Communities and Local Government figures are not directly comparable with these other indicators.

-
6. A month on month comparison of the Communities and Local Government index and price is not advised, as the series are not seasonally adjusted and comparisons over periods of less than a year could be affected by seasonal fluctuations.
 7. Further details on the methodology of the index can be found in the "housing statistics by topic" section of Housing Statistics website, at:
<http://www.communities.gov.uk/housing/housingresearch/housingstatistics/housingstatisticsby/housingmarket/>.
 8. Details of officials who receive pre-release access to the CLG House Price Index up to 24 hours before release can be found at:
<http://www.communities.gov.uk/documents/statistics/pdf/hpiprereleaseaccess.pdf>
 9. Further quarterly and annual house price data can be found on the Communities and Local Government website in Housing Market Live tables 507, 508 and tables 590 to 594.
 10. The next six release dates are:
 - Tuesday 14 July 2009
 - Tuesday 11 August 2009
 - Tuesday 15 September 2009
 - Tuesday 13 October 2009
 - Tuesday 10 November 2009
 - Tuesday 15 December 2009
